UV Sensor "UV-Air"

UV sensor with male threaded body (M22x1.5)

**Properties of this sensor**
The "UV-Air" is a sensor with a male threaded body (M22x1.5). The sensor contains integrated electronics and is shielded against electromagnetic interference. Sensor configuration options are spectral response, signal output type and measuring range. The signal output is either a voltage of 0 to 5 V, a current of 4 to 20 mA, CAN bus interface or USB. The UV sensor is available with a NIST or PTB traceable calibration.

The measuring range of analog sglux UV sensors is 3 orders of magnitude corresponding to 5 mV to 5 V or 4.02 mA to 20 mA output. The highest sensitivity range is 1 nW/cm² to 1 µW/cm². The lowest sensitivity range is 20 mW/cm² to 20 W/cm². The digital sglux UV sensors contain an integrated microprocessor that converts the UV radiation into 125kbit/s digital CAN bus data. A large dynamic range of 5 orders of magnitude allows to measure low radiation and strong radiation without changing the probe. Customers may specify any range between the mentioned limits.

Page 3 of this datasheet allows to enter requirements of the needed sensor. After selection you may forward this document to factory or agent, or alternatively use the sensor probe online configurator at www.sglux.com. Please contact us for assistance.

SENSOR PROBES OVERVIEW

**UV-Surface** → Top looking surface-mount UV sensor
For UV radiation reference measurements of radiation exposed to a surface (diameter 38 mm).

**UV-Air** → Threaded body UV sensor
With M22x1.5 thread for many mounting possibilities i.e. inside UV radiation chambers.

**UV-Cosine** → Waterproof cosine corrected UV sensor for outdoor use
Stain repellent for outdoor or in-water measurements. Particularly suited for UV-Index measurements.

**UV-Water-G3/4** → 10 bar water pressure proof UV sensor with G3/4” thread
Used in pressurized water systems. Suited for low and medium pressure lamps.

**UV-Water-PTFE** → 10 bar water pressure proof UV sensor with G1/4” thread
Used in pressurized water systems. Suited for low pressure lamps.

**UV-DVGW** → UV sensor for DVGW (40°) certified water purifiers
Complies with standard DVGW294-3(2006), suited for certified water purifiers.

**UV-DVGW-160** → UV sensor for DVGW (160°) and OENORM certified water purifiers
Complies with standard DVGW294-3(2006) and OENORM 5873, suited for certified water purifiers with 160° FOV.

**UV-Cure** → Sensor for strong UV irradiation, working temperature up to 170° (338°F)
To control curing processes or other high temperature operations where strong UV light is present.

**TOCON-Probe** → Miniature UV sensor
Miniature UV sensor in M12x1 housing. Available with 0 to 5 V voltage output.

ACCESSORIES FOR ANALOG SENSOR PROBES

**Sensor Monitor 5.0**
measuring and control module

**RADIKON**
converter box and measurement controller

ACCESSORIES FOR DIGITAL SENSOR PROBES

**UVTOUCH** →
digital multi-channel UV radiometer

**DIGIBOX** →
CAN-to-USB converter

**Control Pad** →
windows 8 based 10.1” tablet computer display unit

WINDOWS

**WIN294** →
measurement window acc. to DVGW 294-3 and OENORM M5873
